Grand Rapids, Michigan 49503

Dear Mr Vugteveen

SUBJECT. File No 2P7-EC29-0CPM; Timberline North,
Unnamed Tributary to Pine Creek/Wetland
Section 13, T5N, R16W, Park Township, Ottawa County

The Department of Environmental Quality (DEQ) has reviewed the preliminary plat of Timberline North, which includes lots 1 through 35. The Tributary to Pine Creek has a contributing drainage area of less than two square miles at this location, therefore, the establishment of a floodplain is not required under Section 117 of the Land Division Act, 1967 PA 288, as amended.

This letter grants no permit. A permit application must be filed with the DEQ for any activity that may take place below the ordinary high water mark of an inland lake or stream, or within any associated wetlands. An application form can be downloaded from the DEQ's website at www.michigan.gov/jointpermit or is available upon request. Note that the \$500 fee paid for this review may be credited toward future Land and Water Resources Division (WRD) fees related to this project.

Section 116 requires the DEQ furnish such information that may be helpful or necessary in its opinion to adequately plan the development and secure approval of the final plat. We therefore furnish the following:

1. Lots 10, 11, 33 and 35 as well as proposed road appear to require relocation, enclosure of the Unnamed Tributary to Pine Creek and/or filling of the wetland to avoid the building envelope area.
2. Although we have no objection to the preliminary plat under the Land Division Act, a stream relocation or enclosure and/or filling of a regulated wetland requires a permit from the DEQ under the Natural Resources and Environmental Protection Act, 1994 PA 451, as amended (NREPA).

Please note the following must be accomplished before we can recommend approval of the final plat by the Department of Licensing and Regulatory Affairs (LARA).

- 1 The proprietor's certificate on the final plat must state that any lots or park lots embracing waters of the Unnamed Tributary to Pine Creek are subject to the correlative rights of other riparian owners and the public trust in these waters
- 2 Copies of any necessary DEQ permits are submitted to this office
- 3 A revised preliminary plat is submitted to this office for review if any significant revisions are made.

One copy of the preliminary plat with our "No Objection under Sections 116 & 117 of PA 288" noted is being returned with this letter. If you have any questions, or if we can be of further assistance, please contact me

Sincerely,

Mario Fusco, Jr., P E
