Service Authorization

Services you request must be authorized or approved by an affiliate of the Lakeshore Behavioral Health Alliance. That agency may approve all, some, or none of your requests. You will receive notice of a decision within 14 calendar days after you have requested the service during person-centered planning, or within 3 business days if the request requires a quick decision.

Any decision that denies a service you request or denies the amount, scope, or duration of the service that you request will be made by a health care professional who has appropriate clinical expertise in treating your condition. Authorizations are made according to medical necessity. If you do not agree with a decision that denies, reduces, suspends, or terminates a service, you may file an appeal.

Services and Network Providers

MENTAL HEALTH MEDICAID SPECIALTY SUPPORTS AND SERVICES DESCRIPTIONS

If you are a Medicaid beneficiary and have a serious mental illness, or serious emotional disturbance, or developmental disabilities, or substance use disorder, you may be eligible for some of the Mental Health Medicaid Specialty Supports and Services listed below.

Before services can be started, you will take part in an assessment to find out if you are eligible for services. It will also identify the services that can best meet your needs. You need to know that not all people who come to us are eligible, and not all services are available to everyone we serve. If a service cannot help you, your Community Mental Health will not pay for it. Medicaid will not pay for services that are otherwise available to you from other resources in the community.

During the person-centered planning process, you will be helped to figure out the medically necessary services that you need and the sufficient amount, scope, and duration required to achieve the purpose of those services. You will also be able to choose who provides your supports and services. You will receive an individual plan of service that provides all of this information.

In addition to meeting medically necessary criteria, services listed below marked with an asterisk * require a doctor's prescription.

Program Specific Guidelines

Some programs may place restrictions on the person served. You will receive information about events, behaviors, or attitudes that may lead to the loss of privileges and means by which the person served may regain rights or privileges that have been restricted. Talk to your primary worker for more information.

The Michigan Medicaid Provider Manual contains complete definitions of the following services as well as eligibility criteria and provider qualifications. The Manual may be accessed at:

www.mdch.state.mi.us/dch-medicaid/manuals/MedicaidProviderManual.pdf

Use the *Service and Provider Guide* to promote consumer CHOICE

Just as each consumer has individual needs, each provider in our network has special qualities. When more than one provider is available for the service authorized for you, you may choose the organization that will best meet your unique needs.

Definitions of mental health services, are displayed on the left side of the page.

Vocational Skill Building

This program will assist you to prepare for and achieve economic independence. It includes work site activities and employment services related to your Person-Centered Plan.

The agencies or individuals we contract with to provide the service are listed on the right side of the page.

You can identify the providers available in your network when you see your county's logo beside the provider's name

Muskegon CMH =  Ottawa CMH = 

Lakeshore Coordinating Council
for Substance Abuse Services

The logos of Muskegon County and Ottawa County are attached to indicate providers in your network.

We provide the most up to date information available at the time of publication. As you know Medicaid rules are subject to change as are the provider contracts in our network. This guide is intended as a planning tool, but is in no way a substitute for the advice of your healthcare professional.

When assessments indicate the need for mental health services, individuals with Medicaid are entitled to the following *covered services*.

Assessment

Definition of Covered Service

Providers in Our Network

Assessments

Assessment includes a comprehensive psychiatric evaluation, psychological testing, substance abuse screening, or other assessments except for physical health, conducted to determine a person's level of functioning and mental health treatment needs.

Initial Assessments

Psychiatric Evaluation

Psychiatrists are available to assess your need for medications to help control symptoms of mental illness and other medical conditions.

Psychological Evaluation

This is an evaluation using psychological testing administered by a fully qualified and licensed staff to help determine your diagnosis in order to recommend the best treatment for you.

All Other Assessments and Testing

This refers to professional assessments and testing, other than psychological tests, that are done to determine your level of functioning and your treatment needs.

Health Assessment

This includes activities provided by a physician, registered nurse, physician assistant, nurse practitioner, or dietitian to determine your need for services and to recommend specific treatment.

Comprehensive Physical Therapy	

Clinical Services

Definition of Covered Service

Health Services include assessment, treatment, and professional monitoring of health conditions that are related to or impacted by a person's mental health condition. A person's primary doctor will treat any other health conditions.

Medication Administration is when a doctor, nurse, or other licensed medical provider gives an injection, an oral medication, or a topical medication.

Medication Review is the evaluation and monitoring of medicines used to treat a person's mental health condition, their effects, and the need for continuing or changing their medicines.

***Occupational Therapy** includes the evaluation by an occupational therapist of an individuals' ability to do things in order to take care of themselves every day, and treatments to help increase these abilities.

***Physical Therapy** (includes the evaluation by a physical therapist of a person's physical abilities (such as the way they move, use their arms or hands, or hold their body), and treatments to help improve their physical abilities.

***Speech and Language Therapy** includes the evaluation by a speech therapist of a person's ability to use and understand language and communicate with others or to manage swallowing or related conditions, and treatments to help enhance speech, communication, or swallowing.

Crisis

The standard for whether or not a mental health emergency exists when a “prudent layperson” would determine from the member’s symptoms that crisis services are needed.

Definition of Covered Service

Crisis Interventions are unscheduled individual or group services aimed at reducing or eliminating the impact of unexpected events on mental health and well-being.

Intensive Crisis Stabilization is another short-term alternative to inpatient hospitalization. Intensive crisis stabilization services are structured treatment and supported activities provided by a mental health crisis team in the person’s home or in another community setting.

Crisis Residential Services are short-term alternatives to inpatient hospitalization provided in a licensed residential setting.

Extended Observation Beds (or 23-Hour Stay Units) are used to stabilize a mental health emergency when a person needs to be in the hospital for only a short time. An extended observation bed allows hospital staff to observe and treat the person’s condition for up to one day before they are discharged to another community-based outpatient service or admitted to the hospital.

Partial Hospital Services include psychiatric, psychological, social, occupational, nursing, music therapy, and therapeutic recreational services in a hospital setting, under a doctor’s supervision. Partial hospital services are provided during the day – participants go home at night.

State Inpatient

Inpatient services provided by State psychiatric hospitals for people with mental illness, and Centers for persons with developmental disabilities.

Caro Center

Therapy

Mental Health Therapy and Counseling for Adults, Children and Families includes therapy or counseling designed to help improve functioning and relationships with other people.

Individual Therapy

These are services designed to focus on improving your emotional and mental functioning, and to achieve better interpersonal and social relationships.

Family Therapy

Similar to individual therapy, with a focus on improving family communication and relationships.

Group Therapy

This service focuses on providing therapy to a group of people experiencing similar difficulties. You will benefit from the strengths of the group members as well as the skill of the therapist to improve your emotional and mental functioning, and to achieve better interpersonal and social relationships.

Care Management

Definition of Covered Service

Treatment Planning assists the person and those of his/her choosing in the development and periodic review of the individual plan of services.

Person-Centered Planning is the development and review of the plan of service, including the pre-planning meeting. This includes writing your outcomes and objectives on the plan; identifying how you will achieve those outcomes and who will help with that, if needed.

Supports Coordination or Targeted Case Management: A Supports Coordinator or Case Manager is a staff person who helps write an individual plan of service and assures the services are delivered. His or her role is to listen to a person's goals, and to help find the services and providers inside and outside the local community mental health services program that will help achieve the goals. A supports coordinator or case manager may also connect a person to resources in the community for employment, community living, education, public benefits, and recreational activities.

Assertive Community Treatment (ACT) provides basic services and supports essential for people with serious mental illness to maintain independence in the community. An ACT team will provide mental health therapy and help with medications. The team may also help access community resources and supports needed to maintain wellness and participate in social, educational, and vocational activities.

Fiscal Intermediary Services help individuals manage their service and supports budget and pay providers if they are using a "self-determination" approach.

Home-Based Services for Children and Families are provided in the family home or in another community setting. Services are designed individually for each family, and can include services such as mental health therapy, crisis intervention, service coordination, or other supports to the family.

Ottawa CMH	
Muskegon CMH	

Additional Services

Definition of Covered Service

Peer-Delivered and Peer Specialist Services. Peer-delivered services such as drop-in centers are entirely run by consumers of mental health services. They offer help with food, clothing, socialization, housing, and support to begin or maintain mental health treatment. Peer Specialist services are activities designed to help persons with serious mental illness in their individual recovery journey and are provided by individuals who are in recovery from serious mental illness.

Additional Services /Life Skills continued

Behavioral Management Review: If a person’s illness or disability involves behaviors that they or others who work with them want to change, their individual plan of services may include a plan that talks about the behavior. This plan is often called a “behavior management plan”. The behavior management plan is developed during person-centered planning and then is approved and reviewed regularly by a team of specialists to make sure that it is effective and dignified, and continues to meet the person’s needs.

***Assistive Technology** includes adaptive devices and supplies that are not covered under the Medicaid Health Plan or by other community resources. These devices help individuals to better take care of themselves, or to better interact in the places where they live, work, and play.

***Environmental Modifications** are physical changes to a person’s home, car, or work environment that are of direct medical or remedial benefit to the person. Modifications ensure access, protect health and safety, or enable greater independence for a person with physical disabilities. Note that other sources of funding must be explored first, before using Medicaid funds for environmental modifications.

Transportation may be provided to and from a person’s home in order for them to take part in a non-medical Medicaid-covered service; such as, Skill-Building Services, and Community Living Supports.

Respite Care Services provide short-term relief to the unpaid primary caregivers of people eligible for specialty services. Respite provides temporary alternative care, either in the family home, or in another community setting chosen by the family.

Prevention Service Models; such as, Parent Management Training, Childcare Expulsion Prevention, etc. use both individual and group interventions designed to reduce the likelihood that individuals will need treatment from the public mental health system.

Additional Services for Only Habilitation Supports Waiver (HSW) and Children’s Waiver Participants:

Definition of Covered Service

Providers in Our Network

Some Medicaid beneficiaries are eligible for special services that help them avoid having to go to an institution for people with developmental disabilities or nursing home. These special services are called the Habilitation Supports Waiver and the Children’s Waiver. In order to receive these services, people with developmental disabilities need to be enrolled in either of these “waivers”. The availability of these waivers is very limited. People enrolled in the waivers have access to the services listed above as well as those listed here:

Chore Services (for Habilitation Supports Waiver Enrollees) are provided by paid staff to help keep the person’s home clean and safe.

Healthy Focus

MOKA

Family Skills Training is education and training for families who live with and/or care for a family member who is eligible for specialty services or the Children’s Waiver Program.

The Substance Abuse treatment services listed below are covered by Medicaid. These services are available through Lakeshore Coordinating Council for Substance Abuse Services, a partner in the Lakeshore Behavioral Health Alliance. Dual-diagnosis refers to co-existing disorders of substance use and mental illnesses.

Definition of Covered Service

Access, Assessment, and Referral (AAR)

determines the need for substance abuse services and will assist in getting to the appropriate services and providers.

Outpatient Treatment (OP) includes counseling for the individual, and family and group therapy in an office setting.

additional service features in italics

Intensive Outpatient (IOP) is a service that provides more frequent and longer counseling sessions each week and may include day or evening programs.

Methadone and LAAM Treatment is provided to people who have heroin or other opiate dependence. The treatment consists of opiate substitution monitored by a doctor as well as nursing services and lab tests. This treatment is usually provided along with other substance abuse outpatient treatment.
